EDUCATION

Bachelors of Software Engineering

Bahria University Karachi Campus

10/2021 - Present

CGPA : 3.65

Pre Engineering

Bahria College Karsaz (BCKz)

05/2019 - 05/2021

Percentage : 89.86%

EXPERIENCE

GoGrab - ECommerce Web Application

MERN Framework & JWT Authentication

11/2023 - 01/2024

<https://github.com/jawad-mohsin/GoGrab>

Achievements/Tasks

- Built a multi-user e-commerce platform for buyers, sellers, and admins, addressing the market gap for a robust and user-centric solution.
- User-friendly interfaces, secure authentication, and efficient data management ensure a smooth and protected experience for all users.
- Powered by React.js (frontend), Node.js/Express.js/MongoDB (backend), JWT authentication, and RESTful APIs (Axios) for a scalable and efficient architecture.

Inventory Management System (POS)

.NET (C#) & SQL

05/2023 - 06/2023

<https://github.com/jawad-mohsin/Point-of-Sale>

Achievements/Tasks

- Created an Inventory Management System, a functional solution for automating and streamlining inventory-related tasks.
- An efficient system for inventory tracking, order management, stock replenishment, and reporting.
- Overall, the inventory management system project has successfully addressed the problem of manual inventory management and offers a foundation for further enhancements and future deployment.

PERSONAL PROJECTS

CHAT SPHERE | Next.js, React.js, MongoDB, Prisma (02/2024 - Present)

- <https://github.com/jawad-mohsin/chat-sphere>

- Build a Full Stack NEXT.js 14 Real-time Chat Messaging App with fully complex functions by using Next.js, Next Auth for authentication, MongoDB for all database management
- The messaging platform offers personal and group chats with options for seen or unseen messages. Users can easily search chats or contacts and edit their profile or group chat info as needed.
- Pusher for Real-time messaging, React-Hook-Form for form validation, Tailwind CSS for a stunning UI design, and Next Cloudinary for image upload and storage.

EXPENSE TRACKER | Vue.js (02/2024 - 02/2024)

- <https://github.com/jawad-mohsin/expense-tracker>

- Expense tracker web app built using Vue.js for dynamic front-end functionality.
- Utilizes LocalStorage for seamless data persistence, enabling users to access their transaction history.
- Features include viewing total balance, income, expenses, adding new transactions, and deleting existing ones for efficient financial management.

Weather Forecast Web App | Javascript & Tailwind CSS (11/2023 - 11/2023)

- <https://github.com/jawad-mohsin/weather-forecast-web-app>

- Intuitive interface enabling users to effortlessly input location details for accurate weather forecasts.
- Crafted with Tailwind CSS for a sleek, modern interface that adapts seamlessly to various devices.
- Utilizes a weather API to dynamically fetch and display up-to-date weather information.
